

## NANDIA'S COPPER

### FAQ's

#### 1. What inspired you to write the Nandia Trilogy?

I have been working in the alternative health care field for over three decades. During that time, I have encountered many people who have come to believe that the power to heal illness and imbalance is somehow beyond them.

My desire is to have the readers of the Nandia series come to recognize the incredible power that exists within each individual. My hope is that readers realize that all that is needed to resolve any limitation already exists within them.

#### 2. How much of the events of Nandia's Copper reflect your life as its author?

Most of what is written in Nandia's Copper comes from my own firsthand experience, either in my personal life, or in my role as a natural healer. The opening scene in Chapter I, for example, comes directly from a recurring dream I've had. There are scenes with religious leaders in the story that are reflections of my personal experience. Also, the tales of using dowsing, music and herbs come from events of my life as well.

For many years, I have been an ordained Essene minister. The wisdom of these amazing people comes through in Nandia's Copper. My non-denominational ministry is featured at [www.sevenfoldpeace.com](http://www.sevenfoldpeace.com)

#### 3. In Nandia's Copper, you describe pendulum dowsing as a tool for gathering information that aids in the healing process. How effective is dowsing?

Dowsing is an ancient intuitional art, designed for the conscious mind to be able to access knowledge held within the Inner Self. Of course, we are all capable of deluding ourselves. Learning dowsing, we realize we are only effective when we can set aside our preconceptions and allow an unbiased flow of intuitional information. We are all capable of dowsing. Years of practice hones any dowser's effectiveness. It is an invaluable tool for combining the intellect and the intuition.

Book Three is Nandia's Children, expected release in 2018 (or sooner). A story of Nandia's home planet under siege, the conclusion to The Nandia Trilogy is the story of children who are being systematically kidnapped to restore a failing generation on the besieger's planet.
